**DataMirror Extends the Value of IBM GreenStreak
By Offering Affordable iSeries High Availability Solution**

"HA for Under 60K" Offering Ideal for Small-to-Medium Sized Businesses

TORONTO, CANADA – August 6th, 2002 – DataMirror (Nasdaq: DMCX; TSX: DMC), a leading provider of enterprise application integration and resiliency solutions, today announced a special high availability (HA) solution package aimed at IBM iSeries users. Comprised of two licenses, implementation, training, maintenance and support, the complete HA product suite delivers a low cost solution ideal for small-to-mid size enterprises and is only available until October 31, 2002.

Building on IBM's GreenStreak promotion for iSeries, DataMirror delivers a broader offering to iSeries customers—specifically, a cost-effective high availability solutions package with enhanced service levels to protect and maintain iSeries investments for under \$60,000 (USD). Industry leaders that have recently selected DataMirror LiveResiliency™ software to safeguard their critical iSeries systems include Mellon Financial Corporation, FedEx, Friends Provident, Standard Paper Box, Boehringer Ingelheim, Seta Corporation, Werner Company, and Household International.

"Smaller enterprises require the same data protection and high availability as larger organizations, but rightfully demand solutions that are designed with their unique needs and systems in mind," said Stewart Ritchie, Vice President, Sales, Americas, DataMirror. "DataMirror's 'HA for Under 60K' deal addresses this need with a specialized package that offers the best of our proven high availability products for iSeries to make complete data protection and 24/7 availability a reality for any organization."

Comtech Group, one of the largest IBM Solutions Providers in the U.S. and a DataMirror business partner, believes DataMirror's offering will extend the value of IBM GreenStreak to even more customers and help Comtech deliver the right solutions to meet the needs and budgets of both small and large customers.

"DataMirror's 'HA for under 60K' offering is based on DataMirror's iCluster™ resiliency software, a proven solution that enables continuous availability through failure detection and operational switching, helping businesses run more smoothly and efficiently," said Tom Horan, Vice President, Business Development, Comtech Group USA. "When combined with IBM GreenStreak, DataMirror's promo makes high availability affordable for many small and medium-sized businesses that have been reluctant to invest capital in high availability or upgrade their existing AS/400s to new iSeries systems—even though the long-term return on investment can be huge. The combination of DataMirror's offering and IBM GreenStreak means that our customers benefit from deep discounts on both IBM hardware and DataMirror software, getting a total solution for less."

DataMirror is an IBM High Availability Business Partner, a Cluster Middleware Business Partner, and an All Star Partner in Development. DataMirror is also a member of the IBM iSeries High Availability Council and has been first-to-market with a number of innovative availability technologies including LOB support, real-time IFS support, data area/data queue journaling support, and MQSeries resiliency support. DataMirror was also the first High Availability Business Partner to successfully implement a high availability product using IBM's iSeries clustering technology at a customer site.

For more information, including terms and conditions, or to sign up for DataMirror's "HA for Under 60K" offering, please visit www.datamirror.com/hapromo or call 1.800.362.5955.

About DataMirror

"Safe Harbor" Statement under the United States Private Securities Litigation Reform Act of 1995:

Forward-looking statements in this press release, including statements regarding DataMirror Corporation's business which are not historical facts, are made pursuant to the "safe harbor" provisions of the United States Private Securities Litigation Reform Act of 1995. Forward-looking statements include statements of plans, objectives, strategies and expectations. The words "anticipate", "believe", "estimate" and "expect" and similar expressions are intended to identify forward-looking statements. Numerous important factors affect DataMirror's operating results and could cause DataMirror's actual results to differ materially from the results indicated by this press release or by any forward-looking statements made by, or on behalf of, DataMirror, and there can be no assurance that future results will meet expectations, estimates or projections. These factors include, but are not limited to, the following: the difficulty of developing, marketing and selling new products successfully; variability of quarterly operating results; dependence upon on the continued growth and success of DataMirror's software products; competition; rapid technological change and new product introductions; dependence upon continued growth in the database and enterprise data integration markets; dependence upon relationships with complementary vendors and distribution channels; the ability to recruit and retain key personnel; risks of international operations, including currency exchange rate fluctuations and global economic conditions; possible software errors or defects; possible infringement claims by third parties; and other factors discussed in the Company's Annual Information Form and other periodic filings with the United States Securities and Exchange Commission and other regulatory authorities. Should one or more of these risks or uncertainties materialize, or should assumptions underlying the forward-looking statements prove incorrect, actual results may vary materially from those indicated in any forward-looking statements. The Company disclaims and does not assume any obligation to update these forward-looking statements.
